

Kuo Kuang Power Plant: Environmental Plant of the Year 国光电厂荣获 2007 年度最环保电厂

In 2007, our 520 MW gas-fired Kuo Kuang Power Plant in Taiwan has been recognized as the “Environmental Plant of the Year” by a leading international publisher in Asia. This serves to confirm Kuo Kuang’s contributions and efforts in environmental protection and supporting the social and economic development of the local community.

Kuo Kuang has always contributed its best effort to fulfil its commitment to protect the environment. It has established an Environmental Impact Statement (EIS) since 1999 to demonstrate its care for the community. It is also the first and only independent power producer (IPP) in Taiwan to be awarded the international standard certification ISO 14001 for environmental protection.

Consideration of environment, health and safety has always been Kuo Kuang’s top priority. In 2006, it has obtained the OHSAS 18001 certification for its Occupational Health and Safety system.

Looking ahead, Kuo Kuang will continue to be the power behind Taiwan, supporting its growth with a safe, reliable and clean electricity supply.

2007 年，我们在台湾的国光电厂（520MW 燃气电厂）获亚洲主要国际媒体机构评选为「2007 年度最环保电厂」。此项殊荣足证国光在环境保护工作上有杰出的表现，并对当地的社会和经济发展作出重大贡献。

国光在保护环境方面一直不遗余力，自 1999 年起已制订环境影响说明书(EIS)，显示其对重视环保的决心。国光是台湾首间及唯一一间取得 ISO 14001 国际环保认证的独立发电企业。国光一向将环保、职业健康与安全置于首位。在 2006 年，国光取得职业健康与安全 OHSAS 18001 认证。

展望未来，国光电厂将继续致力为台湾提供安全、可靠及洁净的电力，推动该区的发展。
